The overall data page we've mocked up is here:

<https://wcms.epa.gov/goldkingmine/data-gold-king-mine-response>

We're working with the GIS folks to put together a public facing map viewer of the data. The data will ONLY be pulled from the approved spreadsheets we're posting to this page. So it will be completely QA/QC'd.

The viewer will go above the raw data. Sort of like the radnet one
